This time last week we were launching our new vision and values at our Employee Communications Sessions. We had some staggering results. The level of interaction was incredible and with feedback like this we're looking forward to an exciting year...
"I felt inspired and wanting to change"
"I'm motivated and really like the concept of the 'values'"
"Inspired, motivated, involved and ready to OWN IT!"
#employeecommunications #throwbackthursday #valuesmatter #greatteam #drivingculturechange

Thank you to our team, our customers and suppliers. Stay safe, stay at home.

In these uncertain times, we have worked around the clock to move our contact centre and teams to remote working. Our focus has been to ensure the safety and wellness of our team and to support our customers. We've had to take some tough decisions to do this. Now into week 2 and with some time to reflect, we wanted to say a huge thank you to the team that have worked so hard to make this happen and to our customers who are supporting us during this difficult time. We appreciate your understanding.
STAY HOME. STAY SAFE AND THANK YOU!

CUSTOMERS FIRST

Alphabet

It's not normal for us to stay at home and it's not normal for your vehicle to either.

As we've stayed at home, our vehicles have sat idle. And as we take time to adjust and consider our wellbeing, our vehicles need a check up to!

We predict that as lockdown measures reduce and we see a rise in travel as people return to work, demand for car maintenance and repair will soar. There will be a backlog of MOT's and servicing, which will cause significant demand on the UK garage network.

So, we need you to act now!

The collage features several overlapping screenshots of the 'Alphabet' website's 'Keeping you mobile' section. The main page includes a 'Tell us about your maintenance needs' form with fields for Registration, Make, Model, and MOT Date. A 'FAQs' section addresses questions like 'Why do I need to complete my details?' and 'What should I do about my MOT?'. A 'Your MOT' section provides a checklist for users. A 'Book now' button is visible at the bottom of the page. The screenshots are arranged to show different parts of the user interface, including text, form fields, and images of people interacting with the site.
