

# Robust and Resilient Supply Chains

How The MTC can help

## Free to SMEs:- Supply Chain Readiness Assessment

The Supply Chain Assessment tool is a high level landscaping tool designed to help companies focus on the key areas that they need to be a robust and resilient company with the aim of making them a strategic supplier and a successful profitable business.

We work in the most effective way for you and your team, the free of charge assessment can be completed via the remote media of your choice; Zoom, Teams, Skype etc and is estimated to take between 2 to 3 hours.

Our friendly senior advisor will talk you through the 50 questions and help you answer them whilst supporting you in identifying the opportunities for your business to improve.

We return the feedback with 3 scores; Resilience, Robustness and Digital Awareness and focused improvement areas to address the gaps and shortfalls identified in the assessment.

Please contact [mss@the-mtc.org](mailto:mss@the-mtc.org) if you would like a Supply-chain Readiness Assessment.
