BioPak
It doesn't cost the earth

Who Am I?

Who Are We?

Global Mission

The BioPak mission is a world without waste. We want to see a widespread behavioral change where all product design, from raw material to disposal, puts the environment first.

It's All About Compostable Packaging

LOWER YOUR ENVIRONMENTAL FOOTPRINT WITH COMPOSTABLE

- Compostable packaging – made from plants, not oil
- Quit regular plastic
- 100% carbon neutral
- Closed loop solution
- Diverts food scraps from landfill
- Create compost in 8 weeks

ZERO WASTE PACKAGING

Your packaging and food scraps will create compost, that improves soil quality, in 8 weeks.

GREEN YOUR BUSINESS

When running a business, reducing your environmental impact may seem like a daunting task (and one that is quite far down the list). However, it's not as complex as you may imagine.

In One Year, You Could:

**AVOID
87,891 KG
OF PLASTIC**

And the 86,133 litres
of oil used to make it

**OFFSET
543,227 KG
OF CARBON**

That's equivalent to
driving a new car around
the entire world 6 times.

PLANT 71 TREES

BioPak support Ecologi with
their tree planting and
environmental restoration
initiatives.

[Calculate your own positive impact!](#)

** Numbers based on average cafe packaging usage
for one year.*

Positive Impact

CELEBRATE THE DATA

BioPak Positive Impact Certificates:

You will receive their positive impact via quarterly certificates. We will show how much carbon you have offset, how much plastic you have avoided and how many trees we have planted on your behalf.

Here is an example impact certificate we could create for you.

IMPACT CERTIFICATE
20/21

TOGETHER WE ARE CREATING
POSITIVE CHANGE

Metric	Value	Impact Description
Offset	543,227 KG OF CARBON	That's equivalent to driving a new car around the world 6 times
Avoided	87,819 TONNES OF PLASTIC	Choosing more sustainable alternatives to finite fossil-based plastics helps fight plastic pollution
Planted	71 TREES	By supporting Rainforest Rescue and Greenfleet with their tree planting and environmental restoration work.

BiOPak
It doesn't cost the earth

How Does it Work?

STEP 1: FIND YOUR LOCAL COMPOSTER

- Request audit and/or quote from your local compost partner using Compost Connect.

STEP 2: SIGN UP

- Confirm how many back of house bins you need and how frequently you need them collected and sign up.
- Your composter will deliver your new composting bins ASAP.

STEP 3: FILL YOUR BIN

- Front of House: Set up your paper bin/restructure your FOH bin stations.
- Back of House: Fill your compost wheelie bin with used compostable packaging and food scraps.
Create nutrient-rich soil within 12 weeks!

Case Study: Forest Green Rovers

BIOPAK SOLUTIONS

We are proud and long time partners of the world's most progressive and sustainable football club – Forest Green Rovers. We supply their compostable packaging and have helped them implement a compost collection.

[Here's a video we recently made for one of our customers.](#)

Case Study: Wilsons Pet Food

Are there any tips you could give companies that perhaps haven't made the switch to plastic-free products, or maybe are thinking about it but aren't sure where to start?

"It can definitely be a big step to make the decision to walk away from plastic, but making the first step in looking, and certainly finding BioPak, is the best place to start. Consumers are now becoming more aware of their carbon footprint and this shows with the way they are choosing to shop."

BioPak Can Help You

At BioPak, creating sustainable packaging that puts the planet first is at the heart of what we do.

Single-use packaging can be unavoidable, but we can help reduce the negative impact on the environment.

As well as being manufactured in an eco-friendly way, and commercially compostable and recyclable, BioPak single-use packaging has a host of other benefits, like guilt-free convenience. It also saves the water and energy required to sanitise reusables, and eliminates the need for cleaning labour.

There is no planet B. That's why it's our mission to produce the most sustainable, environmentally friendly packaging on the market.
